

# Grade 6 Robotics Post Assessment

NAME \_\_\_\_\_ DATE \_\_\_\_\_

Which of the following gear trains would be faster? Why?

If a robot car travels 100 feet in 50 seconds, how fast did it go? Show the units. Show your work.

Describe one difficult problem you solved to build your dragster. What did you try before you found a solution? How did you finally solve it? Use the back if you need more space to write.

What was it like working with a partner on this project?
